

Responsible Visitors' Charter

Please help us to reduce our carbon footprint by following these simple steps:

- Ask our Reception Staff for information about public transport, or consider sharing a taxi.
- Only boil the minimum amount of water required in your kettle.
- Save time and water – consider having a shower rather than a bath.
- Why not visit one of the many local parks? Glasgow has more than any other Scottish city.
- Leave your cans, plastic, paper/cardboard and glass waste to one side. Our Housekeeping team will collect and recycle it on your behalf.
- Curtains play a big part – keep them open to use natural, rather than artificial, daylight whenever possible; and close them on colder nights to help keep your room warm.
- Turn off the tap when brushing your teeth.
- Please let our staff know if you have any suggestions that will help reduce our impact on the environment.
